COMMUNITY SUPPORT SERVICES/CASE MANAGEMENT

I-FAST:
INTEGRATIVE FAMILY AND SYSTEMS TREATMENT

- The Center's Adult Program provides mental health, substance abuse treatment and psychiatric supportive services IN THE COMMUNITY where they are needed most.
- Because Mental, Emotional, Behavioral and Substance Abuse issues affect the WHOLE family, we regard all family members as 'co-facilitators' in treatment. Our **I-FAST** MODEL – Integrative Family and Systems Treatment approach involves family members (with permission from the client) in recovery, treatment and care.
- The Center offers several service tracks. Every client is assessed prior to admission in an effort to determine the most appropriate services to meet his or her needs. Treatment plans are then developed on a completely individualized basis.
- Services provided by licensed, experienced professionals.
- The Center is easily accessible to public transportation and transportation assistance may be available.
